

AIVE — Public Benefit Intelligence & Education

AIVE (Awareness • Intelligence • Verification • Evolution) is a public-benefit intelligence platform helping communities understand outbreaks, economic shifts, workforce risks, and global disruptions.

Executive Summary

Overview

AIVE transforms complex global signals into clear educational tools that empower communities to prepare for change, not react to it. Through outbreak literacy, predictive analytics, AI education, and public dashboards, AIVE strengthens resilience and equitable access to intelligence.

The Problem

Challenges Faced by Communities

Communities face viral outbreaks, unstable economic movements, automation shifts, and geopolitical uncertainties—with limited access to early-warning systems or clear explanations. Information arrives fragmented, delayed, or inaccessible.

The Solution

How AIVE Helps

AIVE converts real-time signals into dashboards, educational modules, and predictive simulations. Designed for public benefit, AIVE prioritizes clarity, accessibility, and preparedness.

AIVE Public Education Programs

1. Outbreak Literacy Tools — Understanding disease trends and risks. 2. Predictive Learning Games — Interactive simulations explaining cause–effect. 3. Economic Stability Education — Inflation, supply chains, and finance basics. 4. Workforce & AI Preparedness — Helping citizens adapt to technological shifts. 5. Global Risk Awareness Tools — Climate, geopolitics, and natural disasters. 6. AI Literacy for Everyone — Accessible AI safety and intelligence education.

Projected Impact

- Thousands of public dashboard users annually • Tools adopted by schools and community groups • Improved outbreak awareness and literacy • Clearer understanding of financial and workforce trends • Equitable access for underserved regions

Organizational Structure

Governance Model

AIVE operates under a fiscal sponsor to ensure transparency, compliance, grant eligibility, and responsible fund management while allowing the core team to stay focused on public impact.

Benefits of Fiscal Sponsorship

- 501(c)(3) grant eligibility • Donation processing and tax-deductibility • Financial oversight and reporting • Compliance and accountability • Administrative support

Funding Needs (Year 1)

AIVE seeks support for infrastructure, engineering, educational content development, community outreach, and compliance. Funds enable stability, accessibility, and program expansion across outbreak literacy, predictive learning, and AI education.

Budget Summary

- Personnel — 40%
- Technology & Infrastructure — 25%
- Education & Content Development — 20%
- Partnerships & Outreach — 10%
- Administrative & Compliance — 5%

Illustrative Case Studies

Case Study 1: A school system used AIVE outbreak dashboards to prepare classrooms and reduce disruption during viral surges. Case Study 2: A workforce center used AIVE automation insights to guide retraining programs. Case Study 3: Families used AIVE economic tools to navigate inflation trends more confidently.

Partnership Opportunities

- Community education collaborations • Sponsorship recognition • Co-branded dashboards • Academic research partnerships • Government and NGO pilots

Program Visuals & System Showcase

The screenshot displays the A.I.V.E. (AI for Visual Education) system interface. At the top, there's a header with the logo and a subtitle: "A public education system helping communities understand outbreaks, economic shifts, and workforce disruption." Below the header is a dropdown menu set to "Global". A large circular progress bar indicates "Clarity 50%" and "Global Stable Awareness NaN%". On the left, a sidebar titled "Agents" shows a list of agents. The main content area features three prediction cards:

- United States energy will move unpredictably due to market adjustments**
 - Target Value: —
 - Predicted: 11/22/2025
 - Actual: 11/24/2025
 - Impact: Low Impact
 - Category: Energy
 - Status: 54%
- United States energy will move unpredictably due to supply shifts**
 - Target Value: —
 - Predicted: 11/22/2025
 - Actual: 11/24/2025
 - Impact: Low Impact
 - Category: Energy
 - Status: 64%
- Brazil finance will experience moderate pressure**
 - Target Value: —
 - Predicted: 11/22/2025
 - Actual: 11/24/2025
 - Impact: Low Impact
 - Category: Finance
 - Status: 61%

A dropdown menu in the center shows categories: All, Finance, Geopolitics, Outbreaks, Security, Education, Technology, Energy, Health, and Recession. A "Daily Forecast" button is also present.
